Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(application filed on or after May 29, 2000)

The patent term adjustment to date is 49 days. If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the term adjustment will be 49 days.

If a continued prosecution application (CPA) was filed in the above-identified application, the filing date that determines patent term adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system. (<http://pair.uspto.gov>)

Any questions regarding the patent term extension or adjustment determination should be directed to the Office of Patent Legal Administration at (703)305-1383.

Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

'DETAILED ACTION

Drawings

1. The corrected or substitute drawings received on 2/21/03 are acceptable.

Allowable Subject Matter

2. Claims 26, 28-71, 78-84, 92, 93, 95 and 96 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 26 and 95, the prior art of record fails to teach the step of determining an equalizer phase error from equalizer tap values determined for a next remote site, where the determined tap values are based on a previous burst from the next remote site, and demodulating the received next burst from the next remote site using the equalizer phase error.

Regarding independent claims 63 and 96, the prior art of record fails to teach the step of determining a gain constant for an equalizer based on received equalizer tap values and scaling the input signal of a next burst to the equalizer to achieve a gain value of 1 based on the determined gain constant.

Regarding independent claim 78, the prior art of record fails to teach a two-part preamble used to drive the output of adaptive filter to a known state, where the first part of the preamble is modulated using a lower order technique, and the second part of the preamble is modulated using a modulation technique of a higher order than that used for the first part of the preamble.

Regarding independent claim 92, the prior art of record fails to teach a method for correcting the phase shift caused by the storage of equalizer tap values where an angle of correction is determined for an incoming data burst from a next remote site based on the correlation of the input and output of the equalizer using the equation specified in said claim.
